Geneva, New York 14456

For an emergency, please dial 9-1-1

Phone: (315) 828-6595

The combined efforts of the volunteer and paid staff of the Geneva Fire Department shall always be directed towards a fire safe community. The fire department shall attempt to educate the community on all matters of fire safety, while maintaining a well equipped and properly trained fire suppression force. The Geneva Fire Department is comprised of [the Hydrant Hose Company](#), [the Nester Hose Company](#), and the [C.J. Folger Hook & Ladder Company](#). The department is staffed by 120 professional firefighters, including 18 career firefighters and over 100 active volunteers.

Natural Gas Emergency in the City of Geneva

If you are experiencing a natural gas emergency, or if you smell a natural gas odor, please call 911 immediately.

Otherwise, please contact us at 1.800.572.1121 to speak with [NYSEG](#).

NYSEG will respond quickly to ensure that you and your family are safe. Here is some information from NYSEG.COM that may assist you.

- Do not smoke or operate electrical switches or appliances. These items may produce a spark that might ignite the natural gas and cause an explosion.
- Do not assume someone else will report the condition.
- Provide the exact location, including cross streets.
- Let us know if sewer construction or digging activities are going on in the area.

Use your senses to detect natural gas leaks. A natural gas leak is usually recognized by smell, sight, or sound. Remember, if you smell natural gas, get up, get out and immediately call us from a neighbor's phone.

- Smell
Natural gas is colorless and odorless. For your safety, a distinctive sulfur-like odor, similar to rotten eggs, is added so that you'll recognize it quickly. Not all transmission lines are odorized.
- Sight
You may see a white cloud, mist, fog, bubbles in standing water or blowing dust. You may also see vegetation that appears to be dead or dying for no apparent reason.
- Sound
You may hear an unusual noise like roaring, hissing, or whistling.

Important natural gas safety information:

Water Main Break in the City of Geneva

If there is a water main break in the City of Geneva during normal business hours, please contact 315-789-3101.

All after hour emergencies, please contact the police department at 315-828-6771.

Water mains are underground pipes that carry water from the reservoirs and pumping stations to your street. Water main breaks usually result from external corrosion of the pipe. Winnipeg soil is highly conductive and corrodes the metallic pipe from the outside in. Extreme weather changes can cause the ground to swell and contract, placing excessive pressure on the water mains, causing any weakened pipe to break.

Water is sometimes discolored after water main breaks, but this should not last long. Do not use discolored water for any purposes that require clean water, such as preparing food and beverages, medical and dental procedures, or laundry.

- Turn on a **cold** water tap and let the water run for a few minutes. Do not choose a tap that has a water filter connected to it, or the sediment may clog your filter. Do not use a hot water tap because it could draw sediment into your hot water tank.
- Catch some water in a light-colored cup or container to see if it is clear. You can use your water if it is clear.
- If the water doesn't clear in 5 minutes, wait 30 minutes and try again.
