

## **Water and Sewer Funds Revenues/Expenditures**

### **Program Summary**

The Water Fund supports Public Works activity and staff in two areas. First, Water Maintenance is responsible for the entire water distribution system, including installation of new water mains, inspections for capital projects, and replacement and reading of water meters. It also enforces the cross-connection program as required by the State. Second, staff at the Water Plant maintains and operates the treatment plant and water reservoir. This includes a water quality testing program per Federal and State regulations.

---

### **How this Makes Geneva Great**

The 2013 Water Treatment and Maintenance Program will ensure delivery of high-quality drinking water to all system customers. Our state-of-the-art drinking water microfilter treatment system has enhanced our capability to deliver a great product efficiently. Additionally, thanks to recent investments in metering technology, the 2013 operations year will mark the third consecutive year with no required rate increase.

Additionally, Water Department staff will address the following programs to make Geneva's drinking water system great.

## Water Revenues

### **Program Summary**

The Sewer Fund supports Public Works activity in two areas. First, Sewer Maintenance maintains 84 miles of sanitary sewers and 30 miles of storm sewers. This includes 850 manholes and 1700 catch basins. Staff carries out routine maintenance work and responds to emergency situations. This work is critical to reducing inflow/infiltration into the system. Second, staff at Marsh Creek Wastewater Treatment Plant maintains and operates all aspects of the plant. This newest treatment asset provides critical flash treatment of wastewater during periods of high flow, including storm and other natural disaster events.

---

### **How this Makes Geneva Great**

The 2013 Wastewater Treatment and Collection Program features the continued high level of service enjoyed in previous years, with an enhanced investment in modernization of plant processes and equipment to provide for environmental and operational sustainability. The 2013 operational year represents the second consecutive year without a required rate increase.

Projects in the 2013 Wastewater program include:

#### *Roof Replacement*

The facility housing our treatment technology has become worn as a result of exposure to weather. Staff is proposing the replacement of the roof at the wastewater treatment facility.

#### *Sewer Lining Project*

In order to mitigate long-term maintenance issues, staff recommends regular lining activity for all sanitary sewer lines in the City. Staff proposes a segment of this maintenance as part of the 2013 program.
